My Hope

## Automation

Doing science involves repetition at multiple levels.  
Automation is more efficient and reduces mistakes.

## Reproducibility

Science should be reproducible, by others and you.  
Your work must be *readable, organized, and self-contained*.

## Correctness

Science's limitations are human.  
We must embrace practices that protect against 'bugs'.

My Hope

## Simplicity

Analyses should be coded as simply as possible.  
Clever and readable are often at odds.

## Openness

Science is a worldwide endeavor.  
It, and access to it, should be free and equitable.

## Science as Software Development

Science is a *process* - no final product, just versions and updates.  
Software developers have tools to help.

## Primary Goal

To develop more efficient research skills.

## Secondary Goal

To make significant progress on your thesis.

## Our belief

We can achieve both in this course!

Let's get started!

My Hope

- Be kind to yourself
- Support each other

## Integrity

Doing the right thing, even when no one is watching.
