1 Introduction

2 When using natbib, this is how to cite other papers (Kopka & Daly, 2004). Of course, using
3 natbib, you can also cite Lamport (1989) like this.

4 Methods

5 Nunc sed pede. Praesent vitae lectus. Praesent neque justo, vehicula eget, interdum id, facilisis
6 et, nibh. Phasellus at purus et libero lacinia dictum. Fusce aliquet. Nulla eu ante placerat
7 leo semper dictum. Mauris metus. Curabitur lobortis. Curabitur sollicitudin hendrerit nunc.
8 Donec ultrices lacus id ipsum.

9 Study system

10 A subsection is initiated like this. Pellentesque interdum sapien sed nulla. Proin tincidunt.
11 Aliquam volutpat est vel massa. Sed dolor lacus, imperdiet non, ornare non, commodo eu,
12 neque. Integer pretium semper justo. Proin risus. Nullam id quam. Nam neque. Duis vitae
13 wisi ullamcorper diam congue ultricies. Quisque ligula. Mauris vehicula.

14 Results

15 References a figure by referencing its label (Fig. 1). You can include a table either by making the
16 table within this tex file, or call from a separate file (e.g., an R-generated table) using the `input`
17 function. As long as it has a label, you can reference your table the same way you reference
18 figures and sections (Table 1).
